

# Join Us on the Space Station Freedom III

A chapter of STARFLEET, the International Star Trek Fan Association, Inc.

## A History of Freedom

After two centuries of war and Industrial Revolution, humans were at the threshold of a new era. The Eugenics Wars were over. Adversaries became friends. And because of those historic changes, space exploration offered an arena of discovery and cooperation that became one of the defining elements in the human experience. The United States of America -- in cooperation with Russia and the Euro-

pean Space Agency -- developed The Space Station Program which, in turn, built the Space Station Freedom. She was commissioned in 2003 A.D. and quickly became the largest, peacetime, cooperative scientific program between the nations of Earth in her entire history. The multi-national scientists stationed on board began long-term research that finally yielded cures for various forms of cancer including breast and ovarian, among others. These scientists also produced new forms of power generation and new ways to conserve and protect Earth's natural environmental resources. The Freedom was a natural test bed for developing space technologies for the 21st Century and beyond.

This a little history written for our chapter and is online at <http://www.ssfreedom3.org>

Let Freedom Ring...

## Space Station Freedom III

413 Stageline Dr.  
Euless, TX 76039-3967

## I'd Like to Join the S.S. Freedom II

- I am already a member of Starfleet, so just transfer me to the Station, S.S. Freedom III.
- I am not a member of Starfleet, I need to join first.
- I would like more information on the Freedom III
- I would like more information on the Starfleet
- I love Star Trek and Science Fiction
